PUBLIC COMMENT
Lander County School District Superintendent **Steve Larsgaard** appeared before the Board to make the following comment for the record:

"I met yesterday with Mr. Etchevery and Ms. Little regarding a pending project the school district is involved in with use of wind turbines to generate green energy. Subsequent to our entering into an agreement with Nevada Energy and Upstar Corporation, the Planning Commission has tabled or suspended construction of wind projects until ordinances have been developed. I appreciate your due consideration for that. However, the school district is currently involved in some very tight deadlines with the wind projects it's entered into. Subsequently, we'd ask that as soon as possible you place completion of your ordinance development on an upcoming agenda due to our tight time constraints. I'd like to introduce you to Jim Harris. He's going to talk about the current state of things and what we're doing. Thank you for your attention."

**Jim Harris** appeared before the Board to make the following comment for the record:

"We're working with the school district in getting approval from NV Energy for rebates to help install wind turbines at some of the schools. We've got those narrowed down to five wind turbines. One will be in Austin; two at the high school; and two at Lemaire. Our turbines are all engineered. We're ready to order the turbines and have them put in this summer. We're on hold right now until we know for sure what the requirements are. We're asking that this be taken into consideration. The rebates expire October 7th. If the project's not in and connected to the grid by then, the rebates expire. It's about $1.7 million in rebates."

**Maryan Grilli** appeared before the Board to make the following comment for the record:

"I've got the twenty-one acres on Round Mountain and Carson. I was here last month requesting the commissioners' opinion on submitting a parcel map. I brought a map with me showing where the utilities enter the land. Each of the parcels have their own utilities. Angie was going to get back to me with some information on the subdivision compliance."

District Attorney Angie Elquist responded to Ms. Grilli’s comment, as follows:

"We're working with the Building Department on that. You need to meet with Gina - we're working together to get that information for you."

Mr. Wood explained that the property was zoned C-1, which required no front property line setback. Mr. Wood stated that because of the property contour, it is necessary to use the existing area for the new residence, which does not allow for a setback. Ms. Cohen requested direction from the Board as to whether or not the Watt Group should apply for a special use permit or a zone change in order to proceed with the proposed project. There was general discussion regarding the rules and procedures for obtaining/maintaining a special use permit versus a zone change. Ms. Cohen answered various questions from the Board and Commissioner Mason concerning the proposed scope of work for the solar project. Mr. Williams noted the following for the record:

"It's really a flip of the coin which way you go. The easiest thing is a zone change; you don't have to worry about a permit. The only thing I see right now, and I don't see that being a problem, is that we really haven't addressed any zoning that far out. It will probably be years and at that time it won't be this bunch that has to worry about it. I'm sure whoever is in power will make it fit within the zoning they need at that time. For everyone considered, a zone change is the ideal situation."

Rod Davis, UNR, was present to address his concerns regarding the legality of approving a zone change to accommodate a single plant. Mr. Williams noted for the record that the Board’s main consideration in granting a zone change is if the requested change is in the best interest of Lander County, as a whole, economically. There was general discussion regarding the need to address renewable energy in Lander County’s master plan. Mr. Price presented testimony regarding the process and time frame involved with obtaining a zone change versus a special use permit.
